How did you first come to work with Copeland?

Julia contacted me via LinkedIn.

What career goals were you trying to achieve?

I just wanted to take the next step up as there was no further progression available in my current job.

How closely did the role fit your career goals?

The job was pretty much bang on. It was the natural next step up - a big company with a lot of room to progress. The sky's the limit.

What have been the benefits of working with Copeland?

Just the ease of everything. You reached out to me in the first place and arranged everything. I just had to turn up for the interview and do my research.

Very friendly, very clear communications. Really easy.
